WRITE/SPEAK/CODE
Day 3: Code

Agenda

- **Intro**

- **Codebase Evaluation**

- **Featured Projects**

- **Additional Search Tools**

- **Working & Workshops**

- **Contributor Raffle**

Your Local Guide

#GOALS

Remember that you are giving something extremely valuable away for free. Make sure that you are working towards your own goals.

#GOALS

- Building a network

- Learning or practicing a new technology

- Showing off your coding abilities

- Giving back to the community

Evaluating a Codebase

- Check the last commit date

- Read the documentation: README, INSTALLATION, CONTRIBUTING, etc.

- Review the comments on pull requests

- Find the community

- Select an issue — and announce it!

Featured Projects

- Instant access to a core contributor or maintainer

- Clear documentation

- Welcoming community

- Issues labelled **WSC**, sized for today's sprint

- Recommended for today's first-time contributors

#oss-ifme

if me is a mental health communication app that allows people to share their mental health experiences in a safe and private space with loved ones. if me is a free, not-for-profit open source software project.

#oss-jupyter

Project Jupyter is an open source project born out of the IPython Project in 2014 as it evolved to support interactive data science and scientific computing across all programming languages.

#oss-5calls

5 Calls transforms passive participation into active resistance. It provides phone numbers and scripts for your local representatives so making your voice heard is quick and easy.

#oss-quill

Quill builds free tools to help students become better writers. It provides writing and grammar activities for elementary, middle and high schoolers.

#oss-18f

18F is an office within the General Services Administration that works with federal agencies to successfully deliver efficient, easy-to-use digital services.
